Introduction

Thanks for using TunePat Amazon Music Converter for Mac!

<u>TunePat Amazon Music Converter for Mac</u> is a professional Amazon Music recorder, which supports downloading and recording songs, albums, playlists, and podcasts from Amazon Music App and Amazon Music Webplayer. Users can set output formats like MP3, AAC, AIFF, WAV, FLAC, or ALAC, manually making it flexible to transfer Amazon Music to more multimedia players and devices. This program can convert music at 10X conversion speed without audio quality loss and keeps the ID3 tags after conversion, which is convenient for users to find the music files.

Key Features

- Download music from Amazon Music HD, Prime & Unlimited.
- Convert Amazon songs, albums, playlists, and podcasts to MP3, AAC, AIFF, WAV, FLAC, and ALAC.
- Support HD/UHD sound quality.
- Support 1X/10X faster conversion speed with lossless audio quality.
- Keep ID3 tags after conversion.
- With Tools available for changing output formats and editing ID3 tags.

System Requirements

- Mac OS X 10.15 or above;
- 1GHz processor or above;
- 512 megabytes (MB) or higher of RAM;
- 1GB of available hard-disk space or higher;
- 1024*768 resolution display or higher Monitor.

- Renew TunePat Amazon Music Converter License

Purchase TunePat Amazon Music Converter for Mac

Tips: To buy a license of TunePat Amazon Music Converter for Mac, click here.

1. Why should I buy TunePat Amazon Music Converter for Mac?

The free trial version of TunePat Amazon Music Converter enables you to convert the first minute of each song. After you purchase this product, you will receive your Registration key to remove the trial version limitations.

2. What Benefits do we have after Registration?

- FULL features and perfect conversion.
- FREE upgrades to the latest versions of the same product.
- FREE technical support.

Register Mac Version of TunePat Amazon Music Converter

Step 1: When you purchase an order successfully, you will receive an email with the license key. Run TunePat Amazon Music Converter on Mac and then directly click \equiv and **Register** to open the registration window as below:

Step 2: Copy and paste the registration **Email** and **Code** you received into the registration pop-up window, then click the **Register** button.

Step 3: Once finished the Registration process, the limitations of the trial version will be removed.

Tips:

1. Make sure your computer is well-connected to the Internet.

2. We suggest you should just copy & paste the Registration information into the pop-up dialog.

3. Make sure both the Registration Email and Registration key are provided by our company after purchasing. If you have not paid, please click **Buy Now** to get a license.

4. Registration codes for Windows and Mac are not universal. And a license key can only be used for one computer device.

5. Please make sure the Registration Email and Registration key you entered are both complete and correct.

Renew Amazon Music Converter License

Our monthly and annual subscribers are supported with auto-renewal services. Users will receive a fresh license key through their email, and TunePat's license key needs to be manually registered when the subscription expires.

A Register window will appear when you click the blue box in the lower left corner. Simply press the

Renew License button, enter your email address and the latest code, and then choose Confirm.

You will see a window popping up labeled "You have successfully registered with the program. Thank you for your support!" with the expiration date of your license. Please get in touch with us to cancel the auto-renewal for you before the expiration date if you won't be using this program any more.

Choose Audio Source

Choose an audio source you want to use. They all have their useful features to satisfy your personal needs.

UTutorial of TunePat Amazon Music Converter for Mac

If you record music from Amazon Music App, you can use the Amazon Music App to download music by copying the song URL. This option allows you **Ultra HD** audio quality as well as a rapid download speed to ensure the output sound quality.

If you record music from Amazon Music Web Player, you can use the in-built web player to browse and select songs to download. This option allows **HD** audio quality as well as a **10x** download speed. There is no need to install any other software.

Choose Output Settings

Click the **Settings** button in the upper right corner. Here you can choose the conversion mode, output format (MP3/AAC/AIFF/WAV/FLAC/ALAC), bit rate, sample rate, output path, etc.

Convert Music Files from App

Before you use the App mode, make sure you've downloaded the Amazon Music App. When you finish the decision of recording mode, the TunePat and Amazon Music App pages will both be activated. Log in to your Amazon account.

There will be two ways to add Amazon tracks using the App mode, both of which are simple to implement.

The first way is to drag the Amazon music to TunePat. Simply drag the cover art of the song, album, or playlist into the "**Drag the music here**" box, and TunePat will read it automatically.

The second method is to enter the Amazon music URL into TunePat. When you find the Amazon

music you want and then click the three-dot icon, you can select "Share Song/Share Album/Share

Playlist" from the drop-down list, then select "Copy Link" and paste the link to the blue box. When you

click the blue "+" icon, the application will read the selected Amazon song/album/playlist.

Select "**Convert**" if you want TunePat to begin converting now. If you want to add more Amazon songs from other playlists, choose "**Add More**" or return to the Amazon Music App to repeat the previous steps.

Convert Music Files from Web Player

When you choose to record music from the web player, you will get two pages. One is the interface of

TunePat and another one is the web player of Amazon Music.

Open one of your Amazon playlists, artists, podcasts, or albums in the web player, click on the Click to

add button, and then select the songs that you'd like to convert by clicking the Add button.

To convert the selected items, click on the **Convert** option to start. To convert several albums or playlists at once, you can click on the **Add More** button. Then, repeat the steps of finding out and loading what you want to convert. When added all items you wish to download, just tap the **Convert** button.

Now TunePat will take a short time to complete the conversion and you can soon enjoy Amazon music

without any limitation.

Check Conversion History

Once the conversion is done, you can find the downloaded Amazon Music in the Converted interface

or the output folder you customized in the previous step. Normally, the file folder will pop up

automatically, if not, you can activate it manually by clicking the file icon next to any song.

The **AA/AAX Converter** is a helpful tool that allows users to convert local AA/AAX audiobooks into commonly used audio formats, making them compatible with most players. It's important to note that this tool is currently only available to registered users.

UTutorial of TunePat Amazon Music Converter for Mac

To convert your audiobooks, simply click on the **+** Add button to select the files from your computer. You can then customize the output format, quality, and choose the folder where you want the converted files to be saved. If you need more advanced settings, you can click on the **gear icon** next to the audiobook title. This tool also offers the option to automatically split audiobooks based on chapters or equal-sized segments. Additionally, you can enable the **Apply to all** option if you have multiple files that require the same settings. Finally, click on the **Convert** button to initiate the conversion process.

Format Converter's basic function is to convert Amazon music to MP3/M4A/FLAC/WAV/OGG/AIFF.

Users can also select either **Mono** or **Stereo** audio in Channels depending on their own requirements. If you have the special need of making two audio channels that represent a left and right sound, please choose **Stereo**.

Click + Add to add songs you want and complete the settings including Format, Quality, Channels and the output folder. After all, click Convert to start.
